Recruitment advertisement

The project

We're three students of the group one of theory of the subject *Design and Testing I*. We're looking for between two and three co-workers for the working group. The goal is to achieve the objectives of each deliverable in order to obtain the highest possible rating.

Your profile

We look for students who have qualities to work in groups and who may be able to adapt to any situation. It is important that they commit themselves to the group to try to obtain the highest possible rating. The indispensable requirement is to have passed the subjects *Introduction to Software Engineering and Information Systems (IISSI)* and *Architecture and Integration of Software Systems (AISS)* of the 2nd year of the degree.
